Types of Agilix Animal Probiotics for Chicken

i. AGILIX CHICKEN FEED FOR LAYER CHICKEN

Agilix Chicken Probiotics for Layer Chicken reduces the chances of layer chicken having diarrhea and can control the Salmonella bacteria significantly. The probiotics enhances the utilization of Calcium, acetic acid and iron, improving the egg quality and reducing cholesterol content in the egg.

The micro-organisms also effectively enhances the feed utilization rate, promotes a healthy digestive system of the layer chicken. Probiotics improves a disease-resistant livestock and decrease its anti-stress capacity.

ii. AGILIX CHICKEN PROBIOTICS FOR WEIGHT GAIN

Agilix Chicken Probiotics for Weight Gain improves feed efficiency, enhances the digestive system of livestock leading to poultry immune system improvements.

Probiotics increase daily gain and decreases feed conversion ratio, which means you feed lesser and your chicken grow bigger! With this approach, farms will reduce the environmental impact and thus reducing pollution.
